X-BLQ-EC Series Overview

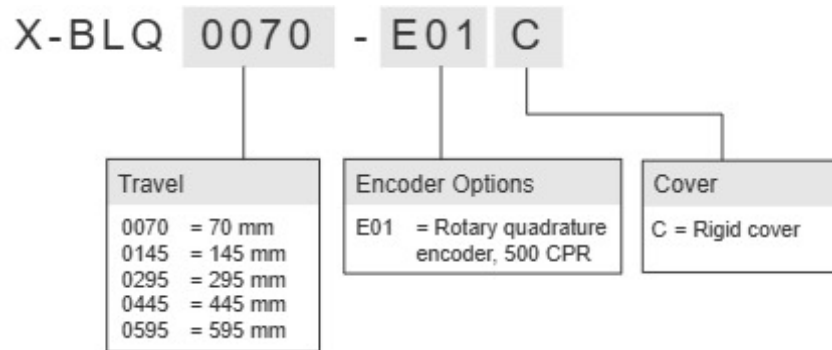

Zaber's X-BLQ-EC Series products are computer controlled, belt-driven linear stages with integrated stepper motors and controllers. A built-in motor encoder allows closed-loop operation with slip/stall recovery features. A rigid non-contact cover prevents the ingress of small objects. They are stand-alone devices requiring only a standard 48 V power supply for operation.

An indexed knob provides convenient manual control for versatile operation even without a computer. These stages connect to the RS-232 port or USB port of any computer, and they can be daisy-chained with any other Zaber products. The daisy-chain also shares power, making it possible for multiple X-Series products to share a single power supply. Convenient locking, 4-pin, M8 connectors on the unit allow for secure connection between devices.

With travel lengths up to 595 mm, 20 μ m repeatability, and a maximum speed of 2.0 m/s, X-BLQ-EC stages are perfect for rapid positioning over large distances. Like all of Zaber's products, the X-BLQ-EC Series is designed to be 'plug and play' and very easy to set up and operate.
